Protecting Your Home and Car Against Crime

To protect your home:

Light, noise and community watchfulness help prevent crime. These tips (including Neighborhood Watch) are also applicable for renters of houses and apartments who can work with management to provide proper lighting and other security measures.

- Know your neighbors. Join Neighborhood Watch and/or have a block map that includes names and telephone numbers of everyone on your block. Also, get to know your neighbors behind you. Use a phone tree to let people know about problems in the area to watch out for. Keep your neighbors informed when you will be away or if other people will be staying at your house. Create an atmosphere where people look out for each other and report suspicious activities.

- Keep porch lights and at least one light in your house on at night. Use motion detector lights and solar sensory lights.

- Keep bushes and trees trimmed around your house and outdoor lighting.

- Make sure all your exterior doors have good locks—at least dead-bolt locks with a minimum one-inch throw. Make sure outside doors are solid, 1 ⅜ inch metal or hardwood. Make sure your windows have good locks—particularly those at ground level. Lock double-hung windows by sliding a small-headed bolt or nail through a hole drilled at a slight downward angle in a top corner of the inside sash and partway into the outside sash.

- Don’t hide your house keys under the doormat or in a flower pot. Rather, give an extra key to a trusted neighbor or friend.

- Be familiar with the curfew law. It is against city law for youth up to the age of 18 to be out on the streets (unless going to/from work or with an adult) between 11pm and 5am, Sunday through Thursday, and 12am to 5am on Friday and Saturday. Call the police at (720) 913-2000 to report curfew violations.

- Report nonworking streetlights to Xcel Energy at 1-800-895-4999, press 1 and then 3.

- If 75 percent of residents in your block decide they need mid-block or mid-alley lighting installed, call the Department of Public Works at 3-1-1 (Denver Information Line) and ask for Traffic Engineering.

- For household property, make two lists of your valuables and your credit cards, one for home and one for a safety deposit box or other place you feel is protected.

- Read all fine print in household insurance policies to be informed of what is and is not covered on your policy. Have your insurance agent do a periodic update. If you have special items, such as expensive jewelry, that are not covered, take out special riders or keep the items in a safety deposit box.

- Call your police Community Resource Officer for a free safety assessment of your property.

To protect your car:

Do not make it easy for someone to take your car on a joyride or to do damage to it.

- Again, know your neighbors; report suspicious activities to your neighbor and the police.

- ALWAYS lock your car doors and close windows, even when “momentarily” going into a house or business.

- Never leave valuables or other tempting items inside the car where the can be seen.
Protecting Your Car and Home Against Crime (cont.)

- Park in well-lighted areas on the street.
- Keep garage doors locked at all times. Keep garage and surrounding areas well lit. Install motion detector or photocell lighting on the garage or nearby.
- Purchase a steering wheel protector and use it every time you leave the car.
- Do not leave keys hidden on the body of the car. Instead, give an extra key to a trusted neighbor or friend.
- Use a car stereo system that is theft protected.

When you go away:

- Ask a neighbor to collect mail and newspapers, and offer to return the favor; or place a stop delivery order with the newspaper/post office. Empty properties can be targets for vandals.
- Put an automatic timer on at least one light and a radio. Install photoelectric sensors to turn outside lights on and off automatically.
- Tell a trusted neighbor when you’re leaving and when you’ll return. Include an itinerary and phone numbers where you can be reached in an emergency.
